for the Environment*

EXPERT (M/F/D) IN REMOTE SENSING AND GEOINFORMATION ANALYSIS

space4environment is a company engaging in the field of geographical information and remote sensing data located in Niederanven, Luxembourg. We specialise in providing environmental consultancy and geospatial services to the European Environment Agency (EEA), European Space Agency (ESA) and other international and national institutions.

To complement our team of international professionals we are seeking a motivated **expert (m/f/d)** responsible for **remote sensing** and **geodata analysis** related tasks.

Activities:

- Preparation, processing and analysis of satellite imagery
- Broad range of GIS related work

Requirements:

- Degree in geography/environmental science-related field of studies
- Profound knowledge in remote sensing and geographical information systems (QGIS, ArcGIS)
- Independent way of working in a project- and team-oriented environment and willingness to acquire new skills
- Readiness/flexibility for international travels and collaboration with international partners
- Communication skills and reporting/presentation competences
- Language: English (additional languages considered an asset)
- EU citizenship mandatory

Further preferred qualifications:

- Database use and SQL
- Statistical data analysis

What we offer:

- A full-time employment at office location
- Interesting and diverse work in a very motivated team

Place of work:
